

# Zoom-Ex

**A Tiny Accessory That Converts Your Computer Into a Powerful Magnifier**

**Read fast, efficiently, and comfortably for hours without headache or fatigue!**

**No need for an X-Y table because lines don't run off the screen.**

**No more tedious zigzagging left-to-right!**

**Read one page at a time or add on Zoom-Book to save an entire book in minutes and read it later**

**Zoom-Ex is seamlessly integrated with the multi-functional software package Zoom-Office. Together they comprise the most powerful reading tool for visually impaired person that allows not only magnification but also saving the entire books and provides text-to-speech function.**

# Zoom-Ex

## A Tiny Accessory That Converts Your Computer Into a Powerful Magnifier

**With Zoom-Ex you can read fast and efficiently for hours:**

 Zoom-Ex captures the entire letter-sized page and saves it in digital format. You then can gradually increase the magnification up to 50 times, and navigate the saved page using a mouse, a keyboard, or a control pad. No need for an X-Y table, no head movements, no headaches.

 With a single click you can separate the pictures from the text and reformat the latter for easy reading. Zoom-Ex will automatically add line breaks into the text to make the enlarged lines fit the width of the screen. Just scroll up and down to read the whole page.

 You can select any combination of the foreground and background colors.

**Zoom-Ex enables you to go beyond just effective reading. It revolutionizes the way in which you work with printed matter:**

 You can print the entire magnified text on as many pages as needed. Zoom-Ex wraps the text, lines will never run off the page. Read the printed pages one after another as you would read a book with large fonts.

 You can save the entire page for future reading, send it through email to your friends, import pages saved by others back to Zoom-Ex.

**Zoom-Ex is the lightest magnifier available.**

**It weights only 1 lb and folds like an umbrella.**
